

# PAUL M. MARKOWSKI

Department of Meteorology and Atmospheric Science  
Pennsylvania State University  
503 Walker Building  
University Park, PA 16802

phone: (814) 865-0478  
fax: (814) 865-3663  
e-mail: pmarkowski@psu.edu

## Professional Appointments

2018–present Associate Head of the Graduate Program in Meteorology and Atmospheric Science, Department of Meteorology and Atmospheric Science, Pennsylvania State University, University Park, Pennsylvania

2013–present Professor, Department of Meteorology and Atmospheric Science, Pennsylvania State University, University Park, Pennsylvania

2007–2013 Associate Professor, Department of Meteorology and Atmospheric Science, Pennsylvania State University, University Park, Pennsylvania

July, 2009–October, 2009 Visiting Scientist (sabbatical leave), Deutsches Zentrum für Luft- und Raumfahrt (DLR), Institut für Physik der Atmosphäre, Oberpfaffenhofen, Germany

2001–2007 Assistant Professor, Department of Meteorology and Atmospheric Science, Pennsylvania State University, University Park, Pennsylvania

## Education

Ph.D., 2000, University of Oklahoma (Meteorology)

M.S., 1997, University of Oklahoma (Meteorology)

B.S., 1996, Pennsylvania State University (Meteorology)

## Honors and Awards

Fellow, American Meteorological Society

American Meteorological Society Clarence Leroy Meisinger Award, 2015 (for “advancing knowledge about the genesis of tornadoes through a rich mix of observations, theory, and numerical modeling”)

National Weather Association T. Theodore Fujita Research Achievement Award, 2013 (for “incisive research directly applicable to operational forecasting which has allowed significant advances in our understanding of and forecasting tornadic and nontornadic thunderstorm environments”)

- Penn State University Office of Residence Life Award, 2013 (for “continuous efforts in aiding in the academic and personal development and wellbeing of first-year students” and “making a tremendous difference in the lives of first-year students”)
- Nikolai Dotzek Award (European Severe Storms Laboratory), 2011 (for “outstanding contributions to the science of severe storms”)
- Penn State University Alumni Achievement Award (Pennsylvania State University), 2010 (for “unraveling the mysteries of why and where tornadoes and severe storms will form, saving many human lives”)
- American Meteorological Society Editor’s Award (*Weather and Forecasting*), 2009 (for “his careful, exceptionally timely and critical review of manuscripts resulting in considerable improvement in its scientific quality, and thereby contributing significantly to the high standards of the journal”)
- NSF CAREER Award, 2007
- Invited Lecturer at the Summer School on Convective Storms, Nanjing University, Nanjing, China, 7/2011
- Invited Lecturer at the International Center for Mechanical Sciences, Udine, Italy, 7/2005
- School of Meteorology Award for Outstanding Performance as a Graduate Student, University of Oklahoma, 1999
- American Meteorological Society Fellowship, 1996–1997
- National Science Foundation Fellowship Honorable Mention, 1997
- National Science Foundation Fellowship Honorable Mention, 1996
- Outstanding Service Award, Campus Weather Service, Pennsylvania State University, 1996
- American Meteorological Society Father Macelwane Award (2nd place), 1996
- John Dutton Award, Pennsylvania State University, 1996
- Robert Cole Award (Meteorology), College of Earth and Mineral Sciences, Pennsylvania State University, 1995
- University Scholar, Pennsylvania State University, 1992–1996 (the Honors College was renamed the Schreyer Honors College in 1997)

### Invited International Lectures

- “Forecasting severe convection II: Dynamics and prediction of severe thunderstorms” (week-long course), European Severe Storms Laboratory Training Center, Wiener Neustadt, Austria; 6/2018.
- “Discriminating between tornadic and nontornadic supercells,” European Severe Storms Laboratory Training Center, Wiener Neustadt, Austria; 6/2018.
- “How to make a tornado: Ideas emerging from decades of theory, simulation, and field observations,” Department of Physics, University of Toronto, Toronto, Ontario; 11/2017.
- “How to make a tornado: Ideas emerging from decades of theory, simulation, and field observations,” School of Earth, Atmospheric and Environmental Science, University of Manchester, Manchester, England; 8/2016.
- “How to make a tornado: Ideas emerging from decades of theory, simulation, and field observations,” National Taiwan University, Taipei, Taiwan; 1/2016.
- “How to make a tornado: Ideas emerging from decades of theory, simulation, and field observations,” National Taiwan Normal University, Taipei, Taiwan; 1/2016.
- “How to make a tornado: Ideas emerging from decades of theory, simulation, and field observations,” Chinese Culture University, Taipei, Taiwan; 1/2016.
- “How to make a tornado,” *Second China-U.S. Symposium on Meteorology: Severe Weather and Regional Climate Variability and Predictability*, Qingdao, China; 6/2013.
- “How to make a tornado,” *Conference on Mesoscale Convective Systems and High-Impact Weather in East Asia* (keynote presentation), Beijing, China; 3/2013.
- “Supercells and tornadoes: The past, present, and future roles of observations and models in advancing our understanding,” *6th European Conference on Severe Storms* (keynote presentation), Palma de Mallorca, Spain; 10/2011.
- “Organization of isolated, deep moist convection,” *Summer School on Convective Storms*, Nanjing University, Nanjing, China; 7/2011.
- “Supercell thunderstorms,” *Summer School on Convective Storms*, Nanjing University, Nanjing, China; 7/2011.
- “Tornadoes,” *Summer School on Convective Storms*, Nanjing University, Nanjing, China; 7/2011.
- “Tornado research: The latest inferences from models and observations, and future directions,” *Summer School on Convective Storms*, Nanjing University, Nanjing, China; 7/2011.
- “The Second Verification of the Origins of Rotation in Tornadoes Experiment (VORTEX2),” Peking University, Beijing, China; 7/2011.
- “Tornadogenesis: New insights from field observations and idealized numerical simulations,” *International Workshop on Convective Storms*, Beijing, China; 7/2011.
- “What vortex lines might be telling us about tornadogenesis,” Department of Physical Sciences, University of Helsinki, Helsinki, Finland; 10/2009.
- “A short course on convective storms,” Finnish Meteorological Institute, Helsinki, Finland; 10/2009.
- “What vortex lines might be telling us about tornadogenesis,” Ludwig-Maximilians-Universität, Munich, Germany; 10/2009.

- “What vortex lines might be telling us about tornadogenesis,” Deutsches Zentrum für Luft- und Raumfahrt (DLR), Institut für Physik der Atmosphäre, Oberpfaffenhofen, Germany; 8/2009.
- “Tornadogenesis: Our current understanding, operational considerations, and questions to guide future research,” Japan Meteorological Agency, Tokyo, Japan; 1/2008.
- “The Second Verification of the Origins of Rotation in Tornadoes Experiment (VORTEX2),” (presented jointly with J. Wurman) Japan Meteorological Agency, Tokyo, Japan; 1/2008.
- “Tornadogenesis: Our current understanding, operational considerations, and questions to guide future research,” *4th European Conference on Severe Storms* (keynote presentation), Trieste, Italy; 9/2007.
- “An overview of atmospheric convection,” Centre International Des Sciences Mecaniques, Udine, Italy; 7/2005.
- “The concept of buoyancy and its application to deep moist convection,” Centre International Des Sciences Mecaniques, Udine, Italy; 7/2005.
- “Convective storm initiation and organization,” Centre International Des Sciences Mecaniques, Udine, Italy; 7/2005.
- “Pressure fluctuations associated with deep moist convection,” Centre International Des Sciences Mecaniques, Udine, Italy; 7/2005.
- “Supercell thunderstorms,” Centre International Des Sciences Mecaniques, Udine, Italy; 7/2005.
- “Tornadoes and tornadogenesis,” Centre International Des Sciences Mecaniques, Udine, Italy; 7/2005.

### Grants Awarded

- NOAA VORTEX-Southeast Award NA18OAR4590310, 9/1/2018–8/31/2020, \$299,994, “Using machine learning to improve warnings of nonclassical tornadic storms”
- NSF AGS-1821885, 9/1/2018–8/31/2021, \$1,168,436, “Improving our understanding of vorticity development in supercells through novel thermodynamic observations and an improved treatment of the near-surface layer in simulations”
- NOAA VORTEX-Southeast Award NA17OAR4590189, 9/1/2017–8/31/2018, \$178,176, “An investigation of the effects of complex topography on storm environments, near-surface wind profiles in and near storms, and tornado vulnerability in the southeastern U.S., using existing data and observations from the VORTEX-Southeast field campaign”
- NSF AGS-1536460, 9/1/2015–8/31/2018, \$899,955, “Improving our understanding of tornadic storms using VORTEX2 observations and idealized simulations”
- NOAA Research to Operations (R2O) Program Award NA15NWS4680012, 5/1/2015–4/30/2017, \$447,493, “Advancing storm-scale forecasts over nested domains for high-impact weather”
- NOAA Collaborative Science, Technology, and Applied Research (CSTAR) Program Award NA14NWS4680015, 5/1/2014–4/30/2018, \$375,000, “Improving warning decision support for convective storm events in the eastern United States”

- NSF AGS-1157646, 8/1/2012–7/31/2016, \$1,076,764, “Using the Second Verification of the Origins of Rotation in Tornadoes Experiment (VORTEX2) observations and idealized simulations to understand the lifecycle of tornadoes”
- NSF ATM-0644533, 4/19/2007–3/31/2013, \$747,592, “CAREER: A study of the radiative effects of cloud shadows on the dynamics of long-lived convective storms”
- NSF ATM-0801035, 6/1/2008–5/31/2012, \$964,389, “Collaborative Research: VORTEX2—Multi-scale and multi-platform study of tornadoes, supercell thunderstorms, and their environments”
- NSF ATM-0437512, 11/1/2004–10/31/2007, \$450,186, “Collaborative Research: Study of the genesis, evolution, structure, and dynamic climatology of tornadoes and their environments”
- College of Earth and Mineral Sciences (Deike Research Grant), 6/1/2002–5/31/2003, \$45,000, “The Pennsylvania Mobile Radar Experiment (PAMREX)”
- NSF ATM-0338661, 1/15/2004–1/14/2006, \$221,831, “Collaborative Research: Concentrating vorticity near the ground: Investigation of supercell rear-flank precipitation, vorticity generation, and transport processes”
- NSF ATM-021596, 1/1/2004–5/1/2005, \$482,978, “Studies of the internal structure and dynamics of convective weather systems”
- NSF ATM-010307, 1/15/2002–1/14/2005, \$221,289, “Collaborative Research: Measurement and analysis of the pre-convective boundary layer and convection initiation during the International H<sub>2</sub>O Project (IHOP)”
- UCAR NA97WD0082, 8/1/2002–7/31/2004, \$73,242, “Bow echo development associated with the interaction of convection with complex terrain: Blending observations with idealized simulations”
- NSF ATM-021596, 4/14/2003–4/13/2004, \$6,000, “REU Supplement for Collaborative Research: Measurement and analysis of the pre-convective boundary layer and convection initiation during the International H<sub>2</sub>O Project (IHOP)”
- College of Earth and Mineral Sciences (Wilson Research Initiation), 6/1/2002–5/31/2003, \$6741, “Kinematic differences between tornadic and nontornadic supercell thunderstorms in the middle troposphere”
- NSF ATM-021596, 2/25/2002–2/24/2003, \$19,500, “REU Supplement for Collaborative Research: Measurement and analysis of the pre-convective boundary layer and convection initiation during the International H<sub>2</sub>O Project (IHOP)”

### **Academic Courses Taught**

- Introductory Meteorology (METEO 3)
- Severe and Unusual Weather (METEO 5)
- Synoptic Meteorology (METEO 411)
- Mesoscale Meteorology (METEO 414)
- Atmospheric Dynamics II (METEO 422)

Observing Meteorological Phenomena (METEO 471W)

Radar Observations and Analysis I (METEO 497D/597D)

Radar Observations and Analysis II (METEO 497D/597D)

Topics in Synoptic Meteorology (METEO 512)

Mesoscale Dynamics (METEO 529)

Atmospheric Convection (METEO 538)

First-Year Seminar in the Earth and Mineral Sciences (EMSC 100S)

### **Graduate Students Supervised**

Branden Katona, Ph.D., anticipated graduation in 2020

Shawn Murdzek, M.S., anticipated graduation in 2019 (co-advised with Prof. Y. Richardson)

Giovanni Jiménez-Sánchez, Ph.D., 2018 (Dissertation: “The Orinoco Low-Level Jet”)

Michael Colbert, M.S., 2017 (Thesis: “Exploring the Sensitivity of Convective Storm Characteristics and Dynamics to Grid Spacing in Convection-Allowing North American Mesoscale Forecast System Simulations”)

Branden Katona, M.S., 2016 (Thesis: “Assessing the Influence of Topography on Convective Storm Environments Using High-resolution Operational Model Output”)

Chris Nowotarski, Ph.D., 2013 (Dissertation: “Simulating Supercell Thunderstorms in a Convective Boundary Layer: Effects on Storm and Boundary Layer Properties”)

Tim Hatlee, M.S., 2012 (Thesis: “The Pretornadic and Tornadogenesis Phases of the 12 May 2010 Supercell of Clinton, Oklahoma, Intercepted by VORTEX2”) (co-advised with Prof. Y. Richardson)

Andrew Oberthaler, M.S., 2011 (Thesis: “The Effect of Cloud Shading on Squall Lines: A Numerical Simulation Study”)

Chris Nowotarski, M.S., 2010 (Thesis: “The Characteristics of Numerically Simulated Supercell Storms Situated over Statically Stable Boundary Layers”)

Mario Majcen, Ph.D., 2009 (Dissertation: “A Conceptual Model of Nontornadic Supercells”)

Jeff Frame, Ph.D., 2008 (Dissertation: “The Dynamical Influences of Cloud Shading on Simulated Supercell Thunderstorms”)

Richard James, Ph.D., 2008 (Dissertation: “A Numerical Investigation of the Effects of Dry Air Aloft on Deep Convection”)

Zack Byko, M.S., 2007 (Thesis: “Examining Descending Reflectivity Cores Using High-Resolution Radar Data and a Numerical Simulation”) (co-advised with Prof. Y. Richardson)

Jeremy Ross, Ph.D., 2005 (Dissertation: “Reexamining Analog Forecasting Using NCEP/NCAR Reanalyses”)

John Stonitsch, M.S., 2005 (Thesis: “The Fine-Scale Structure and Evolution of Boundary Layer Wind and Thermodynamic Fields along a Front Observed during IHOP”)

Chris Shabbott, M.S., 2005 (Thesis: “Surface Thermodynamic Observations within the Forward-Flank Downdrafts of Tornadic and Nontornadic Supercells”)

Christina Hannon, M.S., 2003 (Thesis: “An Investigation of Convection Initiation ‘Failure’ on 12 June 2002 Using Mobile Doppler Radars”)

Jeff Frame, M.S., 2003 (Thesis: “The Interaction of Simulated Squall Lines with Idealized Terrain”)

### **Other Graduate Student Committees**

Alex Andersen-Frey, Ph.D., 2017

Scott Loeffler, M.S., 2017

Tim Lulis, M.S., 2017 (Plant Science)

Abdullah Kahraman, Ph.D., 2016 (Istanbul Technical University)

Alicia Klees, M.S., 2014

Burkeley Twiest, M.S., 2014

Ryan Hastings, Ph.D., 2013

Benjamin Green, M.S., 2011

Chris Melhauser, M.S., 2010

Jim Marquis, Ph.D., 2010

Ryan Hastings, M.S., 2009

Robert Carver, Ph.D., 2008

Lindsey Ritchie, M.S., 2008

Brian Monahan, M.S., 2006

Jim Marquis, M.S., 2005

Nettie Arnott, M.S., 2004

Jeff Kron, M.S., 2004

Jackie Kost, M.S., 2004

Ken Loescher, M.S., 2004

John Siewert, M.S., 2004

Emily Kowalski, M.S., 2003

Glen Auslander, M.S., 2003

Phillip Spencer, Ph.D., 2002

**Research Associates Mentored**

Valerian Jewtoukoff, 2016–2017

James Marquis, 2010–2014

Richard James, 2004

**Departmental, College, and University Committee Service**

Associate Head of the Graduate Program in Meteorology and Atmospheric Science, 7/2018–present

University Corporation for Atmospheric Research (UCAR) President's Advisory Committee on University Relations (PACUR), 10/2018–present

Men's Golf Team Faculty Partner, 8/2018–present

University Graduate Council, 8/2017–present

Department of Meteorology and Atmospheric Science Graduate Academic Programs Committee, 6/2018–present

Schreyer Honors College Faculty Advisory Committee, 1/2017–5/2018

Department of Meteorology and Atmospheric Science Promotion and Tenure Committee, 7/2013–6/2015, 7/2017–present (chair from 7/2017–6/2018)

Department of Meteorology and Atmospheric Science Undergraduate Academic Programs Committee, 8/2001–6/2018 (chair from 10/2006–7/2008)

Department of Meteorology and Atmospheric Science Faculty Search Committees, 11/2002–6/2003, 10/2004–12/2006, 9/2007–4/2008 (chair), 11/2012–3/2013, 2/2013–10/2013, 1/2015–4/2015

Department of Meteorology and Atmospheric Science Colloquium Series organizer, 7/2011–7/2015

College of Earth and Mineral Sciences Museum and Art Gallery Advisory Board, 9/2008–12/2011

College of Earth and Mineral Sciences Faculty Performance Evaluation Committee, 2010

College of Earth and Mineral Sciences Faculty Advisory Committee, 10/2006–6/2009

College of Earth and Mineral Sciences Academy of Scholars Planning Committee, 10/2006–5/2007

College of Earth and Mineral Sciences Museum Exhibits Committee, 1/2005–12/2006

Department of Meteorology and Atmospheric Science Ad hoc General Education Committee (chair), 1/2004–1/2005

College of Earth and Mineral Sciences Museum Director Search Committee, 8/2003–1/2004

Department of Meteorology and Atmospheric Science Ad hoc Computers in the Curriculum Committee, 11/2002–12/2003 (co-chair)

College of Earth and Mineral Sciences Deike Renovation Task Force, 9/2002–5/2003

College of Earth and Mineral Sciences Facilities Task Force, 8/2002–9/2002

**Scientific Society Memberships**

American Meteorological Society, 1995–present

National Weather Association, 2011–present

**External Service, Advisory Panels, and Other Activities**

UCAR President's Advisory Committee on University Relations (PACUR), 10/2018–present

American Meteorological Society Atmospheric Research Awards Committee, 1/2017–present

Taught week-long course (Forecasting Severe Convection II) at the European Severe Storms Laboratory Training Center in Wiener Neustadt, Austria, 6/2018

NCAR C-RITE Workshop Program Organizing Committee, 3/2017–1/2018

Chief Editor, *Weather and Forecasting*, 1/2012–10/2017

VORTEX-Southeast Scientific Steering Committee, 3/2015–2/2017

Invited Participant, NRC Workshop to Review NSF AGS Goals and Objectives, 4/2014

National Football League Special Weather Adviser for Super Bowl XLVIII (1/2014–2/2014)

Invited participant, NCEP/NSF Weather Ready Nation workshop, 4/2012

Invited participant and panelist, NCEP/NSF Weather Ready Nation workshop, 12/2011

Associate Editor, *Weather and Forecasting*, 1/2004–12/2011

VORTEX2 Steering Committee, 9/2003–6/2011

Associate Editor, *Monthly Weather Review*, 1/2006–12/2010

National Science Foundation Observing Facilities Assessment Panel (OFAP), 10/2005–6/2010

National Weather Service Quick Response Team (called on to survey violent tornado damage), 1/2003–12/2009

Workshop co-convener, VORTEX2 Workshop at Penn State, 11/2009

National Severe Storms Laboratory Review Panel (2/2009)

5th European Conf. on Severe Storms Program Committee, 10/2008–10/2009

AMS 23rd Severe Local Storms Conference Program Committee, 10/2004–11/2006

Program Chair, AMS Symposium on the Challenges of Severe Convective Storms, 2/2006

AMS Scientific and Technological Activities Commission on Severe Local Storms, 1/2003–1/2006

AMS 22nd Severe Local Storms Conference Program Committee, 1/2003–10/2004

Workshop convener, VORTEX2 Workshop at Quartz Mountain, 9/2003

Conference session chair

AMS 28th Conf. on Severe Local Storms, Portland, Oregon; 11/2016

AMS 27th Conf. on Severe Local Storms, Madison, Wisconsin; 10/2014  
 6th European Conf. on Severe Storms, Palma de Mallorca, Spain; 10/2011  
 AMS 25th Conf. on Severe Local Storms, Denver, Colorado; 10/2010  
 5th European Conf. on Severe Storms, Landshut, Germany; 10/2009  
 AMS 24th Conf. on Severe Local Storms, Savannah, Georgia; 10/2008  
 4th European Conf. on Severe Storms, Trieste, Italy; 9/2007  
 AMS 23rd Conf. on Severe Local Storms, St. Louis, Missouri; 11/2006  
 AMS Symposium on the Challenges of Severe Convective Storms, Atlanta, Georgia; 2/2006  
 AMS 22nd Conf. on Severe Local Storms, Hyannis, Massachusetts; 10/2004  
 AMS 21st Conf. on Severe Local Storms, San Antonio, Texas; 8/2002  
 AMS 20th Conf. on Severe Local Storms, Orlando, Florida; 9/2000  
 AMS Symposium on VORTEX, Long Beach, California; 1/2000

#### Field experiments

Second Verification of the Origins of Rotation in Tornadoes Experiment (VORTEX2) (mobile mesonet coordinator), 5/2009–6/2009, 5/2010–6/2010  
 Pennsylvania Mobile Radar Experiment (PAMREX), 10/2004–11/2004, 10/2005–12/2005  
 International H<sub>2</sub>O Project (IHOP), 5/2002–6/2002  
 National Geographic Society Tornado Project, 5/2001  
 Severe Thunderstorm Electrification and Precipitation Study (STEPS), 6/2000  
 Hurricanes At Landfall Experiment (HAL), 9/1998  
 SUB-VORTEX (Verification of the Origins of Rotation in Tornadoes Experiment), 5/1997–6/1997, 5/1998–6/1998, 5/1999–6/1999 (Field Coordinator, 1998–1999)  
 Verification of the Origins of Rotation in Tornadoes Experiment (VORTEX), 5/1995–6/1995

#### Educational outreach

Delivered public lectures on tornadoes at the Whitaker Center (Harrisburg), 2012.  
 Science adviser for NSF-funded IMAX film (Giant Screen Films), *Tornado Alley*, and accompanying educational materials, 2010–2011.  
 Instructor for COMET (Cooperative Program for Meteorological Education and Training) Mesoscale Analysis and Prediction (COMAP) Course (enrollment comprises Science Operations Officers from the National Weather Service) hosted by the National Center for Atmospheric Research (NCAR), 6/2007, 4/2008, 6/2010  
 Discussed opportunities in atmospheric science with students from underrepresented groups (Villa Maria Academy, an all-girls high school, 1/2007; NC A & T University, an HBU, 11/2007)  
 Attracted funding and provided consultation for the construction of a tornado exhibit in the College of Earth and Mineral Sciences Museum at Penn State  
 Instructor for high school teachers summer weather camp at Penn State University, 6/2002, 7/2003, 7/2004, 7/2006  
 Instructor for middle and high school students weather camp at Penn State University, 7/2002  
 Instructor and consultant for the *Passport to Knowledge* program for PBS, 3/2000–7/2001  
 Reviewer of materials used for Virtual Institute for Satellite Integration Training (VISIT) courses, 10/2001

Over 100 radio, television, newspaper, and magazine interviews given to local, national, and international media on severe storms and tornadoes since 1998, including *National Public Radio*, *Scientific American*, *ABC World News*, *NBC Nightly News*, *The Weather Channel*, *Discovery Channel*, *The Learning Channel*, *National Geographic*, *The Washington Post*, *Good Morning America*, *Agence France-Presse*, *Deutschlandfunk*, *The Philadelphia Inquirer*, *NBC Dateline*, *CBS 48 Hours*, the *BBC*, and *USA Today*
